

MONAX for Enterprise SaaS

We make your contracts work for you

Contract Obligations Management Software

Improved financial performance and lowered transactional risk through the most advanced legal technology

Digital Contracts Repository

- Know the status of all your contractual business relationships
- Get notified and understand actionable obligations to keep things moving

Business Systems Integration

- Connect your business systems to contract milestones
- Monitor contract performance, receive notifications and set triggers

Harmonized Revenue Recognition

- Identify and automate contractual performance obligations by proving delivery
- Visualize mutual understanding between the seller and buyer

Auditability and Intelligence

- Prove compliance via immutable audit trails recorded on a blockchain
- Create reports across your entire portfolio and view all contractual interactions

Embedding contracts in all aspects of your business

Digitized contract execution for digitally native companies

1 Record and manage contracts in one place

2 Orchestrate counterparty interactions and plug-in external and internal systems

3 Contractual data and audit trails from the execution build evidence that you can report
